Work Experience

Digital Dynamics, Remote

Jan 2024 - Present

Full Stack Developer

- Developed Teleneo, a telemedicine platform allowing users to sign up, book appointments, and engage in video calls with approved doctors upon admin approval.
- Designed an Education App backend for managing multiple schools, enabling school owners to create schools, add teachers, staff, and students, and view a feed of activities posted by teachers and staff.
- **Nextjs, ReactJs, Typescript, tailwind css, Shadcn, MongoDB.**

Webwrite, Lahore

Aug 2022 - Sep 2023

MERN DEVELOPER

- Developed a personalized gym panel enabling coaches to add new clients, create customized workout plans, track user activity, and facilitate communication via a commenting system.
- Enhanced the gym admin panel with meal planning and referral code features, providing a comprehensive solution for client management and payment oversight.
- Built a clinic management system for receptionists, doctors, and patients, streamlining appointment scheduling, patient record management, and communication within the clinic.
- Actively engaged in developing a freelancing platform for parents seeking therapists for their children, encompassing therapist, clinic, parents, and admin panels with unique functionalities and user interfaces.
- **AWS EC2, Reactjs, NextJs, Javascript, Typescript, CSS, Sass, Postcss, Node, express, MongoDB, socket.io**

Weproms, Lahore

Jan 2022 - Feb 2022

Wordpress Intern

- Fixed the UI using the plugin Elementor.
- **Wordpress, Elementor, Page Builder**

Education

University of Education, Lahore

Sep 2019 - Nov 2023

BSIT (Information Technology)

CGPA: 3.1 / 4

Projects

- **Desktop Chat:** Developed user registration and login system with real-time chat functionality, accessible on my [Github](#).
- **Dijaskizuri:** Created a single-page application for an events management company, providing users with an intuitive interface to explore and stay updated on upcoming events.
- **Project Vscode:** Designed an online platform where users can register with a username and access a coding environment to write and test JavaScript, HTML, and CSS code seamlessly. The project's codebase can be found on my [Github](#) for reference and review.
